

Daniel Atkinson

Principal Frontend Engineer

(225) 916-9191

daniel@danielatkinson.dev

Seasoned Frontend Engineer with 5+ years experience leading successful projects. Adept in crafting scalable web and mobile applications, guiding teams, and employing Agile methodologies for cohesive collaboration.

EXPERIENCE

Chief Operating Officer, Griffin Games

January 2022 - Present

- Incorporated Agile methodology by leading several weekly meetings and tracking sprints through Jira to drive progress, establish goals, and enhance project execution.
- Led team-wide troubleshooting efforts, consolidating error knowledge and rapidly resolving issues to minimize disruptions and optimize workflow.

Principal Frontend Engineer, Vigilus

May 2019 - Present

- Conducted React and Typescript technical interviews for 80+ candidates to assess proficiency in key concepts and coding practices.
- Led comprehensive on-site training for 30+ incoming developers to foster a unified skillset and accelerate their integration into projects.
- Assisted in feature scoping and estimation for 15+ applications, providing accurate insights about time and financial resources required for project completion.
- Developed 5 focused cross-platform mobile apps using React Native, optimizing performance through utilization of Android Studio and Xcode for both iOS and Android platforms.
- Constructed 6 React websites leveraging Next.js and static site generation to improve page load speed and SEO.
- Designed several adaptable API Clients that interface with backends built using Django, Node.js, or AWS services, effectively utilizing RESTful API principles to enhance data communication and integration within applications.
- Supervised code reviews and merge requests for 30+ developers through Git to ensure coding standards, thorough documentation, and seamless collaboration on diverse features.
- Worked with UI designers to validate the technical feasibility of designs through Figma, accurately translating intricate visions into highly responsive and functional user interfaces across multiple platforms
- Crafted custom reusable component libraries using Storybook, further empowered by Jest for automated testing, leading to minimized codebases and enhanced project scalability

SKILLS

React.JS / React Native
Javascript/HTML/CSS
Typescript
Material UI/Tailwind/Bootstrap

Redux
Figma
Node.JS
Next.JS

Headless CMS / Contentful
Restful APIS / GraphQL
XCode / Android Studio
Circle CI

EDUCATION

Louisiana State University

August 2017 - May 2021

Bachelor's Degree in Computer Science
