Daniel Atkinson

Senior Full-Stack Engineer

(225) 916-9191
daniel@danielatkinson.dev

Senior Full-Stack Engineer with 7+ years of experience building production web and mobile applications with React, TypeScript, C#/.NET, REST and GraphQL APIs, and AWS. Experienced in frontend and backend architecture, authentication, data access, cloud infrastructure, automated testing, and CI/CD, with additional experience in technical scoping, mentoring engineers, and owning applications from design through production.

EXPERIENCE

Vigilus

May 2019 - Present

Principal Frontend Engineer 2025 - Present
Senior Software Engineer 2022 - 2025
Software Engineer 2019 - 2022

- Led technical scoping for 40+ web and mobile applications, translating ambiguous client requirements into system architecture, integration plans, implementation strategy, and delivery estimates.
- Architected and developed 15+ React Native applications and 20+ React web applications, owning projects from technical design through implementation, API integration, testing, and release across iOS, Android, and web.
- Designed and integrated typed API clients for web and mobile applications using TypeScript, REST, GraphQL, and OpenAPI, implementing authentication and authorization flows with JWT and OAuth/OIDC.
- Operated AWS-backed application infrastructure using EC2, S3, RDS, DynamoDB, Cognito, CloudFront, CloudWatch, SES, and IAM, supporting authentication, data storage, file delivery, email, monitoring, and hosting.
- Developed and maintained production desktop and web applications in C#/.NET, using WPF and ASP.NET Core with Entity Framework and LINQ to deliver data-driven features across multiple client projects.
- Implemented automated testing and CI/CD workflows across web and mobile applications, integrating Jest and Playwright with GitHub Actions and CircleCI for automated validation, builds, and deployments.
- Built AI-powered features using OpenAI APIs, LangChain, LangGraph, and DeepAgents, including multi-agent workflows, permission-scoped data access, streamed responses, and real-time voice interactions.
- Worked directly with clients and stakeholders to refine requirements, evaluate technical tradeoffs, communicate implementation constraints, and guide applications from discovery through delivery.
- Owned technical delivery across multiple concurrent client applications, making architecture decisions, identifying delivery risks, coordinating implementation, and supporting projects through production release.

SKILLS

Frontend: React, TypeScript, Next.js, React Native, Vue, Redux
Backend / APIs: C#, ASP.NET Core, Node.js, REST, GraphQL, OpenAPI, JWT, OAuth/OIDC
Data: PostgreSQL, Entity Framework, LINQ, Firebase
Cloud / DevOps: AWS, EC2, S3, RDS, Cognito, CloudWatch, Docker, GitHub Actions, CircleCI
Testing / Tooling: Jest, Playwright, Git, npm
AI: OpenAI APIs, LangChain, LangGraph

EDUCATION

Louisiana State University

August 2017 - May 2021

Bachelor of Science in Computer Science
